

EBC ENERZYME

With ultra-concentrated enzymes, **EBC Enerzyme** accelerates the degradation of biomass, optimizing the production of biogas and biomethane.

MAXIMUM YIELD, ZERO WASTE!

**+ ENERGY FROM EVERY
TON OF BIOMASS**

**THE NATURAL
TURBO FOR
YOUR BIOGAS
PLANT!**

**- ELECTRICITY
CONSUMPTION AND
MIXING TIMES**

**- 15% OF MATERIAL
FED, SAME YIELD!**

EBC ENERZYME

DESCRIPTION

EBC Enerzyme is a mixture of 3 important enzymes active in the degradation of:

- Cellulose and hemicellulose from cellulase and hemicellulase
- Polysaccharides from xylanase and B-glucanase

Today, more and more biogas plants are using more sustainable biomass but which require long retention times; **EBC Enerzyme** increases the degradation efficiency by speeding up the hydrolysis process.

PRESCRIPTION

EBC Enerzyme is indicated in all BIOGAS / BIOMETHANE plants with ALL TYPES OF FEEDING

DOSAGE

10lb (4.54 Kg) day for 1 MW plant
5lb (2.77 Kg) day for smaller plant

AVAILABLE SIZES

10lb (4.54 Kg) Biodegradable Bags
